REFLECTION:

Gheblawi Said Salem Said:

Throughout the whole 2 hours I was fascinated about how well organized the employees are, and how skillful in their passion are they. The most interesting employee I really liked and reflected my student life is Ridwan. Ridwan is the Android developer, he talked about how you must be different from anybody else, not only in your resume, but also while your working life. Lastly, he shared them most important skills every developer should develop.

Abdullah Omar Salem Basaleh

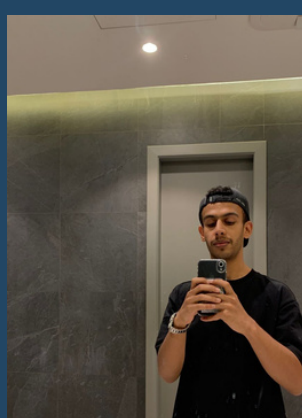

At first, I did not expect the meeting to be this arranged and this exciting. This meeting presented people who were just starting out and until recently were students just like us. We also saw how these people think and why they were specially chosen over others. I learned from this meeting to be passionate and not to give up, and that doing what I love makes me a distinct person from others, because by nature, when you love something, you will put your best effort into it.

Mohammed Yassin Alkhatib:

It was an amazing and good organized event. It provided a overall look at the ICT sector, covering its current state and future prospects. regardless of the challenge of condensing a wide amount of information into a few hours session, the meeting succeeded in sparking interest and curiosity about the world of ICT jobs in the company. It was a reminder of the importance of staying updated in this field and the endless possibilities that ICT offers for innovation and transformation.
